

ECG Check Heart Monitor

Introduction & Prescription

ECG Check turns your patient's iPhone/Android into a heart rate monitor complete with an accurate read out analysis of results in seconds. Your patients can quickly and accurately record, report and store their heart's rhythms for peace of mind.

ECG CHECK provides advanced features and capabilities:

- Easy to use monitor and application
- Compatible with most Smartphones
- Auto start/stop by placing fingers on electrodes
- Automatic analysis within seconds
- User-centric data sharing and security
- Rechargeable battery with charger
- Local storage of ECG, report, and analysis
- HIPAA-compliant web portal
- Ability to access heart data anytime from anywhere
